

**MW 116.08**
**Azodicarbonamide**

Item	Specification
Appearance	Orange yellow fine powder
Decom. Temp.	192 - 198°C
Gas Volume(in Air)	210 - 250ml/g
Part. Sz.(by Malvern)	16 - 18µm
Moisture	Max. 0.3%
pH	6.5 - 7.0

**< CELLCOM - ACMP/Alpha >**
**Description**

CELLCOM - ACMP series are modified blowing agents. They are specially formulated chemical blowing agents for cross-linked LDPE and PP foam with chemically cross-linking by extrusion and continuous oven foaming process. CELLCOM-ACMP series are dispersed easily in polymer compounds and they are suitable for coarse & uniform cell structure and smoother skin in the sponge.

As CELLCOM-ACMP series decomposes relatively faster rate, they are suitable for lower processing temperature without any special kickers or additive, than other normal azodicarbonamide.

**Application**

PE, PP

**Transport&Storage Precautions**

Expiration Date : 1 year

Storage Instruction : Keep away heat, acids, alkalis. Keep container closed, dry.

Transport : Avoid contact with a direct ray of light and moisture.

Using : Wear protective gloves, dust mask, goggles.

Disposal : Incineration or reclamation

Fire & Explosive : Flammable & combustive

Extinguish Media : Preferably water, foam, carbon dioxide gas, sand.

**Packaging**

25kg Carton Box / 25kg Bag
